- Hibernate, JPA
- PostgreSQL, MySQL, Oracle
- Flyway
- JUnit 5, Mockito
- REST API
- HTML, CSS, TypeScript
- Angular
- Jira, Redmine
- Linux, Docker, Nginx, CI/CD
- IntelliJ

LANGUAGES

- Polish (native)
- English (C1)
- German (B1)

EXPERIENCE

Full Stack Developer

September 2022 - now   **ZETO Software Ltd.**

Development and maintenance of a web applications focused on breeding value analysis and handling agricultural requests application for one of the biggest polish government agency ARiMR. Main responsibilities are:

- Back-end (creating/modifying system logic according to analysis)
- Front-end (designing and implementing views based on prototypes)
- Creating SQL scripts for data processing
- Pricing application's modifications for the client
- Proposing the solutions that met the client's needs

My greatest achievement is independently designing and implementing a task management module for a team of several hundred employees, enabling efficient coordination of key activities within a hierarchical system.

Stack: GIT, Maven, Java, Spring Boot, PostgreSQL, Angular, Jira, Redmine

Internship - Full Stack Developer

July 2022 - August 2022   **ZETO Software Ltd.**

Responsible for the full lifecycle development of an application, including designing database and writing both backend and frontend from scratch. Additionally, I was ensuring effective collaboration and communication among five team members. I coordinated the project work to ensure cohesive development and timely completion of tasks

Individual Projects

November 2020 - now

Development and maintenance of various implementations showcased in the GitHub repository. These include implementations of algorithms such as a modified Dijkstra's algorithm, a 2D game, and numerous web applications developed for clients, most notably:

- WaterAdventure - An application designed for booking sailing services and conducting courses for sailing licenses. It enables users to purchase and prepare for exams through e-learning and mock tests.
- AutoKomplet (in progress) - Application that allows users to search for and order specific car parts from an extensive database, along with an admin panel for efficient company management.

EDUCATION

October 2020 - February 2024

Bachelor's Degree
University of Warmia and Mazury in Olsztyn - Computer Science

September 2017 - June 2020

Secondary School
Mathematics and Computer Science profile
